

## Strong power with high efficiency and fuel-economy

- High-power heavy-duty engine delivers strong power.
- Engine variable horse power energy-saving technology enables the machine always work in the lowest fuel consumption zone by matching different power curves.
- The DC intake system increases the filtration efficiency by 10 times and the service life of the filter element is increased by 4~8 times, and the average fuel saving is 5~8%, which effectively prevents the engine from premature wear.

### Upgraded slewing bearing rear axle

- The structure of the slewing bearing rear axle is upgraded again with no wearing parts, serviceability, and service life more than 10000h.
- Heavy chain + integral wheel rim+ disc brake ensure safety and reliability.
- Special integral axle housing for motor grader + heavy duplex roller chain ensure reliability and durability.

## New-generation control system

- Load-sensing operating system with millimeter-level control accuracy guarantees fast cylinder movement and high work efficiency.
- The new generation of control mechanism, the handle effective stroke accounts for 60%.
- All kinds of works can be easily handled with accurate action and labor-saving operation.
   Newly shaped operator station and screed console show high-appearance, the operator station and

display screen are infinitely adjustable in angle.

# Easy and convenient maintenance

- SYCD color LCD display show multi-parameter in multi-language.
- Visual display of fault information, troubleshooting
- guide, and automatic prompts for regular maintenance.

  Wide-opening door of the engine compartment,
  centralized arrangement of common electrical
  components, fuel tank located at the rear of frame all
  make the daily maintenance a convenient and quick

### **Technical specifications**

|                                  | Height of blade (mm)                             | 620                     |
|                                  | Tilt angle                                       | ±90°                    |
| Operating device specification   | Turning angle                                    | 360°                    |
| specification                    | Max. lift above ground (mm)                      | 480                     |
|                                  | Max. depth of cut (mm)                           | 630                     |
|                                  | Blade tip range                                  | 25° ~75°                |
|                                  | Gears  | 6 forward and 3 reverse |
|                                  | Forward speed (km/h)                             | 5/9/12/19/24/38         |
|                                  | Reverse speed (km/h)                             | 5/12/24                 |
| Running                          | Steering angle of front wheel                    | ±45°                    |
| specification                    | Tilt angle of front wheel                        | ± 17°                   |
|                                  | Articulated steering angle                       | ±27°                    |
|                                  | Oscillation angle of front axle                  | ±16°                    |
|                                  | Model of tire                                    | 17.5-25(12PR)(standard) |
| Tank capacity                    | Max. capacity of hydraulic oil tank (L)          | 140                     |
|                                  | Max. capacity of fuel tank (L)                   | 350                     |

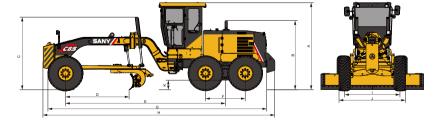

### **Basic & optional configurations**

| Model      | Standard                         | Optional                       |
|------------|----------------------------------|--------------------------------|
| STG190C-8S | 12ft moldboard                   | 14ft moldboard                 |
|            | Overload protection circle drive | /                              |
|            | HVAC                             | /                              |
|            | /                                | Intake preheater (meet −20°C ) |
|            | /                                | Rear camera                    |
|            | /                                | Front scarifier                |
|            | /                                | Front dozer blade              |
|            | /                                | Five-tooth rear ripper         |

#### **Dimensions**

| Model | Name  | STG190C-8S |
|-------|---|------------|
| А     | Height to top of cab (mm)                       | 3348       |
| В     | Height to exhaust pipe (mm)                     | 2717       |
| С     | Height to top of blade lift cylinder (mm)       | 2795       |
| D     | Length - front axle to moldboard (mm)           | 2568       |
| E     | Wheel base - between front and rear axles (mm)  | 6310       |
| F     | Wheel base - between middle and rear wheel (mm) | 1538       |
| G     | Length - front tire to rear of machine (mm)     | 8775       |
| Н     | Overall length - standard (mm)                  | 9340       |
| I     | Width - rear tire center lines (mm)             | 2280       |
| J     | Width - outside front tires (mm)                | 2580       |
| K     | Ground clearance at rear axle (mm)              | 410        |

Notes: Due to technical and product updates, data on specifications might change without prior notice. The pictures may differ from a real machine.
